

Use AtoB Telematics Integration to stop fuel fraud in its tracks

Drivers using fleet cards to fuel personal vehicles

Drivers using fleet cards for non-fuel related purchases

Location tracking

Drivers filling portable gas containers for personal use

Drivers fueling up non-employee vehicles while stopped at a station

Fuel level tracking

Vehicle location tracking

With AtoB, you can verify that your driver's authorized vehicle is within 100 meters of the merchant's location for every card transaction. If not within the radius, the transaction is automatically blocked.

Vehicle location tracking has saved AtoB customers an average of 11¢ per gallon.

Fuel level tracking

With real time tracking of fuel tank capacity and level of every vehicle, AtoB can ensure transactions do not exceed a vehicle's fuel tank capacity.

Monitor suspicious activity with AtoB

Activity report

All suspicious transactions will be automatically added to the Suspicious Activity Report for you to review and monitor.

Transaction blocking*

Opt in for transaction blocking to automatically decline transactions in real time if they seem suspicious.

Real time notifications

Receive real time notifications via SMS or email any time a transaction is flagged as suspicious.
