

How our features help our customers save on fuel costs

Some of the largest fleets in the world have been using the same payment and fuel card technology for decades. The fuel card providers these fleets use focus on a “5¢-10¢ rebate” (which is rarely realized) but do nothing else to control their customer’s bottom line. From fuel fraud and theft to lack of controls and visibility, outdated technology adds unnecessary costs to fleets’ bottom line. Most fleets have sadly accepted these unnecessary costs as “part of doing business”.

AtoB is focused on solving these age-old fueling challenges by revolutionizing the transportation industry with tech designed specifically for fleets and the benefits of working with AtoB far outweigh a simple “5¢-10¢ rebate” – here’s how:

Telematics

Monitor and block transactions that aren’t physically close to an associated fleet vehicle or those that exceed a vehicle’s fuel capacity

Our customers save an average of

11¢ per gallon

Set Restrictions

Take control over when and how your drivers can use their fuel card, ensuring your drivers only make authorized purchases

Our customers save an average of

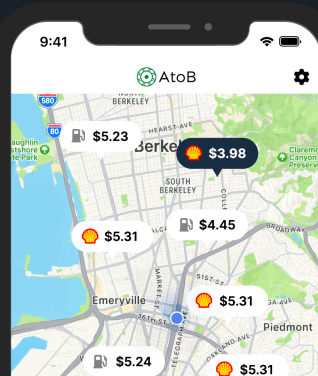

6¢ per gallon

Card Unlock

Ensure your cards can only be used by authorized drivers, protecting you from fuel theft and fraud through the AtoB driver app

Our customers save an average of

5¢ per gallon

Driver App Discount Network

Drivers can locate gas stations with discounts nearest to their route, helping them refuel for the best price anytime, anywhere

Our customers save an average of

9¢ per gallon

Total average amount saved with AtoB features: **31¢ per gallon**
