

LEVERAGE YOUR DATA TO INCREASE VEHICLE UPTIME

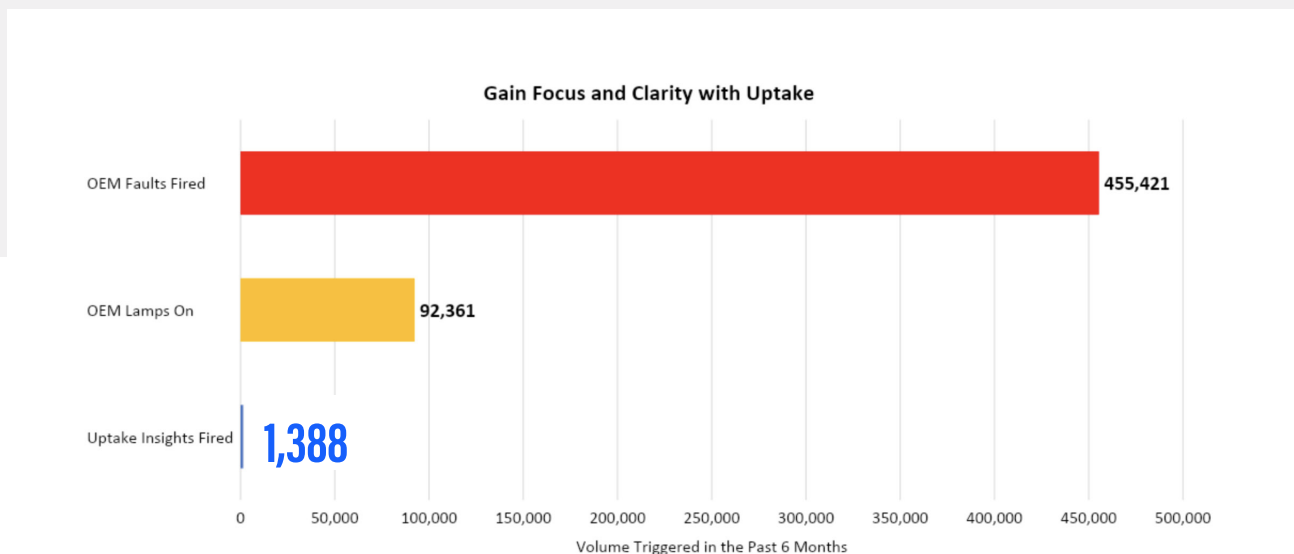

Fleets have the data to improve vehicle reliability, but effectively collecting and organizing that data can be challenging and expensive. To continue to drive operational improvements and realize untapped maintenance related cost savings, fleets need data-backed evidence that help them avoid unplanned downtime and keep vehicles out on the road.

SOLUTION

UPTAKE FLEET CAPABILITIES

With Uptake Fleet, you can tap into the value of your data. It uses your existing telematics, sensor, OEM fault code, and work order data and leverages our 200 off-the-shelf data science insight types to detect pending issues at the component-level before they result in failure. Uptake Fleet empowers drivers, technicians, and shop managers to increase uptime, mitigate the risk of roadside breakdown, schedule proactive service, and efficiently manage spare parts inventory.

**Based on a 700 truck fleet.*

PRIORITIZE TO ACT

Silence the noise and prioritize the actions that will have the biggest impact on the health of your fleet

UPTAKE CAN BE A FORCE MULTIPLIER ALLOWING YOUR MAINTENANCE TEAM TO WORK MORE EFFICIENTLY AND EFFECTIVELY BY LEVERAGING DATA AND INSIGHTS

- Enhance your strategy and existing maintenance workforce with Uptake's predictive Insights
- Access a predictive guide and direction using your existing data sources
- Reduce the impact of human error
- Increase the uptime of your fleet and the efficiency and effectiveness of your maintenance operations without having to increase your workforce

Uptake can easily digest the data you have today, and turn it into actionable Insights that help prevent future breakdowns, avoid unnecessary vehicle down time, and allow greater flexibility when allocating resources and scheduling maintenance for your fleet.

WHAT IS THE IMPACT OF UPTAKE?

1.5%
reduction in fuel costs

4%
reduction in maintenance costs

9.4%
reduction in breakdowns

15%
increases in vehicle availability

37%
reduction in maintenance repair time
