# Fleetio

A better way to manage fleet maintenance

Fleetio is the modern, easy-to-use alternative to spreadsheets and outdated fleet software that empowers your team to manage vehicles and equipment from anywhere. Gain full visibility into your operation, keep your team accountable and make decisions based on data you can trust.

Fleetio connects millions of vehicles, pieces of equipment and fleet management teams around the world.

# Fleet maintenance shouldn't be complicated. It should be automated.

Work together

The entire team can actively collaborate on fleet operations with unlimited users, flexible permissions and features built around exception management.

Manage from anywhere

Handle any fleet-related task or surface critical data anytime, anywhere with intuitive web and smartphone apps designed for busy, distributed fleets.
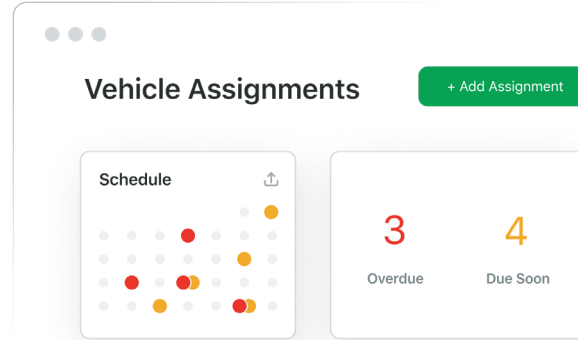

Reduce data entry

Automate your maintenance process from end to end using powerful operational workflows and data integrations. No more manual data entry.

Vehicle and Equipment Management

Track every detail about your owned and leased assets from cradle to grave.

Vehicle Assignments

+ Add Assignment

Schedule

3 — Overdue
4 — Due Soon

Comprehensive Paper Trail

Store everything about your fleet. Important documents, status history, driver assignments, important dates, photos and more — all in one place.

Vehicle Assignment Calendar

Create and manage vehicle assignments all from one calendar. Track and report on vehicle utilization and optimize asset use.

Vehicle Location History

Track a vehicle's location based on its daily activities— fuel ups, inspections, service and telematics tracking data.

Tools & Small Equipment

Link equipment* to vehicles and enable operators to check pieces in and out, keeping everyone accountable for your assets.

Equipment management available as an add-on

Total Cost of Ownership (TCO)

Log purchase and lease information, tolls, fines, depreciation and other expenses to gain insight into the TCO and real cost per mile for your fleet assets.
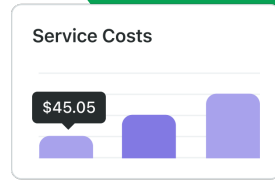

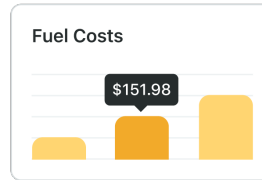

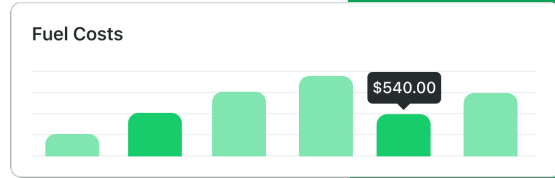

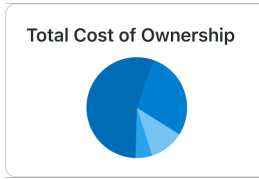

Renewal Reminders

Set up a schedule and get notifications for tag and insurance renewals so everything stays up-to-date and compliant.

Dashboards and Reporting

Unlock powerful insight into fleet maintenance and operations trends.

Total Cost of Ownership

Fuel Costs

$540.00

Fuel Costs

$151.98

Service Costs

$45.05

Flexible Reports

Our growing suite of reports allows you to keep tabs on and get immediate insight into fleet operations. Customize, filter and schedule reports to automatically send to stakeholders on a recurring basis.

Real Cost Per Mile

Cost per mile (or kilometer or hour) is automatically calculated for each asset. This powerful metric shows your fleet expenses by utilization and helps compare assets

Lifecycle Management

Make data-driven decisions about asset acquisition and replacement. Project the optimal replacement range for each vehicle based on utilization, operating costs, depreciation, salvage value and more.

Operating Costs

Track and report on costs such as in-house and outsourced service, fuel and operating expenses. See how much your fleet costs to run over time and better forecast spend.

Utilization

See average vehicle usage per day (by hour or odometer) and spot utilization trends, helping you "right-size" and "right-purpose" asset use.

Dashboards

See your most important metrics at-a-glance. Click any graph to drill down into detailed data and easily manage exceptions.

Automate Maintenance Handling & Resolution

Stay on top of maintenance and reduce downtime from anywhere.

PM Scheduling

Automatically pull in OEM recommended PM schedules for your assets or create custom service programs. See how well you adhere to PM tasks with automated compliance calculations.

Recall Management

Receive timely alerts for NHTSA safety recalls on your vehicles. Take advantage of repairs before others even get their paper mailer.

Service History

Log repairs, service tasks, costs and vendors. Track and report on exactly what it takes to resolve issues and PM tasks and better manage asset lifecycle.

Defect Reporting

Users can report problems with a vehicle such as "brakes making noise" — even from their mobile device. Other users are automatically notified, allowing you to quickly diagnose and resolve issues.

Predictive Maintenance

Forecast service schedules based on actual vehicle utilization to improve planning and budgeting, ensuring you don't get blind-sided by upcoming preventative maintenance.

Mobile Work Orders

Plan, schedule and carry out maintenance with web and mobile Work Orders. See parts and labor subtotals for line items, log which parts were used, which mechanics did the work and monitor labor hours.

Work with Your Team

Fleet managers, drivers, operators and technicians can work efficiently in one central system to move work along faster.

Intelligent Notifications

Push and email alerts are tailored to each user's involvement in maintenance activities, empowering real-time collaboration among team members.

Notification Center

See everything that's happening across your fleet in one feed accessible via web and mobile.
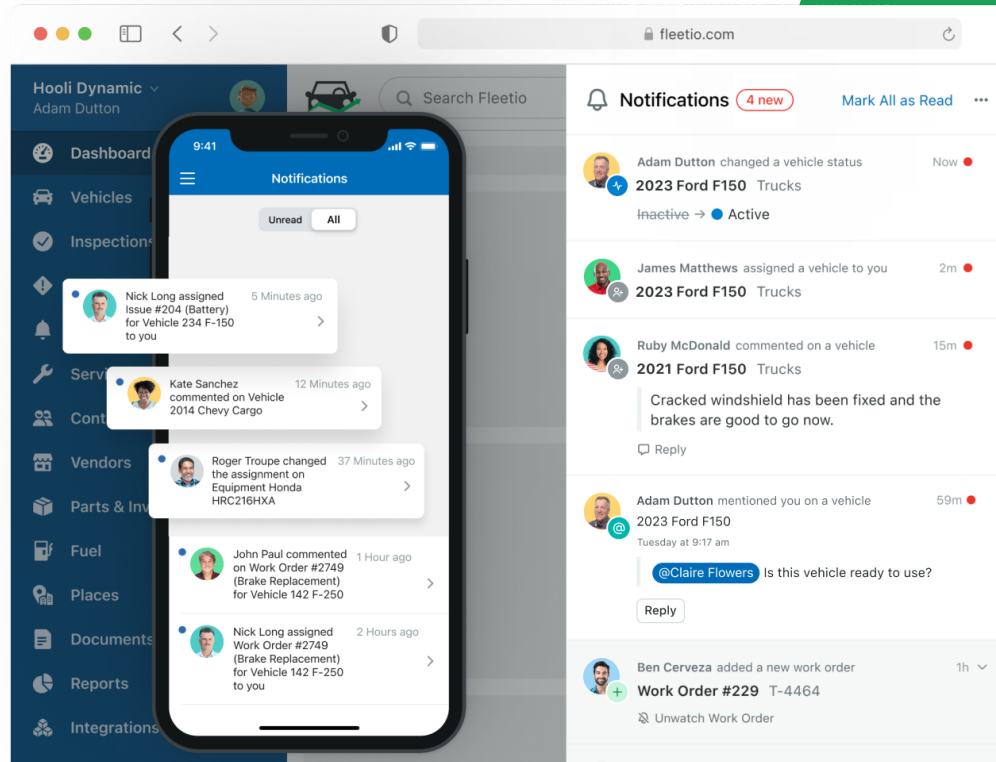

Maintenance Provider Network

Fully transparent third party repair management with an open network of over 100,000 national and independent providers.

Vehicle Enters Shop

Driver takes the vehicle to one of the 85,000+ in-network repair shops.

↓

Repair Order Submitted

Shop creates an electronic repair order with necessary line items and submits for fleet manager review.

↓

Vehicle Enters Shop

Handle approvals electronically via auto-approval policies or manually approve or reject line items.

↓

Vehicle Repaired

Shop is notified of approval/rejection decisions and completes repair.

↓

Back on the Road!

Driver and vehicle get back on the road with the repair order data stored as a new service entry in Fleetio.

Electronic Repair Order Management

Approve repair orders electronically and automate data flow into Fleetio with consolidated billing for all in-network shops.

Repair Order #84 — $1,534.95
- Oil Change
- Catalytic Converter Replacement
- Tire Rotate and Balance
- Balancing and Mounting

Seamless Repair Order Review

Electronically approve or reject maintenance line items from the shop or create auto-approval policies based on specific thresholds. Only pay for work you approve to avoid overcharges.

Improve Visibility into Repair Costs

Completed repair orders and detailed line items are logged in Fleetio automatically, helping you report on current service data in real-time without the headache of data entry.

Consolidated Billing

Receive one monthly bill including all of our maintenance vendors and quickly reconcile with a report in Fleetio, saving your accounting team countless hours of paperwork.

Exclusive Service Discounts

Get preferred fleet pricing at national vendors. No matter your fleet size, Fleetio customers receive exclusive discounts at providers like Firestone, Monro Brake Muffler and many more!

Reduce Downtime for Drivers

After repair orders are electronically approved and maintenance is completed, your drivers get back on the road quickly. No payments, no expense reports, no hassles.

Inspections

Maintain airtight compliance with an electronic inspections and issue management system.

Customizable Forms

Choose from pre-loaded FMCSA §396 and §392-compliant forms or build your own with a drag n' drop editor. Create schedules and reminders so if drivers miss inspections you know right away.

Workflows

Work smarter, not harder. Customize inspection workflows to notify the proper people and help them take action on reported defects immediately, ensuring nothing slips through the cracks.

Location Exceptions

Do your drivers 'pencil whip' their inspections? Fleetio automatically tracks the GPS location of every inspection item on a form, alerting you to suspicious submissions.

Upload Media

When defects are found, drivers can upload photos and comments to provide fleet managers and mechanics with better visibility into issues.

Offline Inspection Mode

Complete inspection reports on mobile and tablet devices with or without cell service, ensuring reports are never lost.
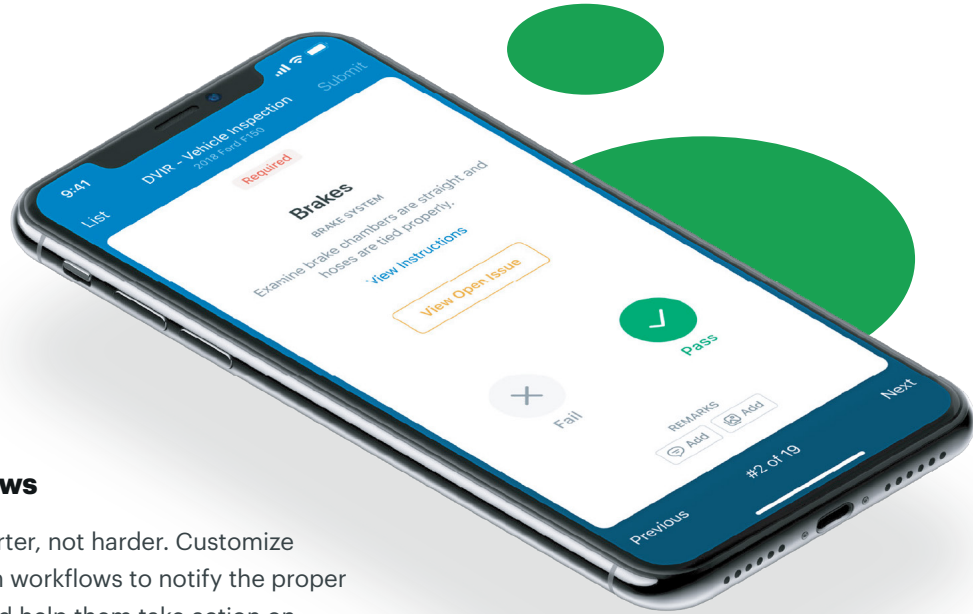

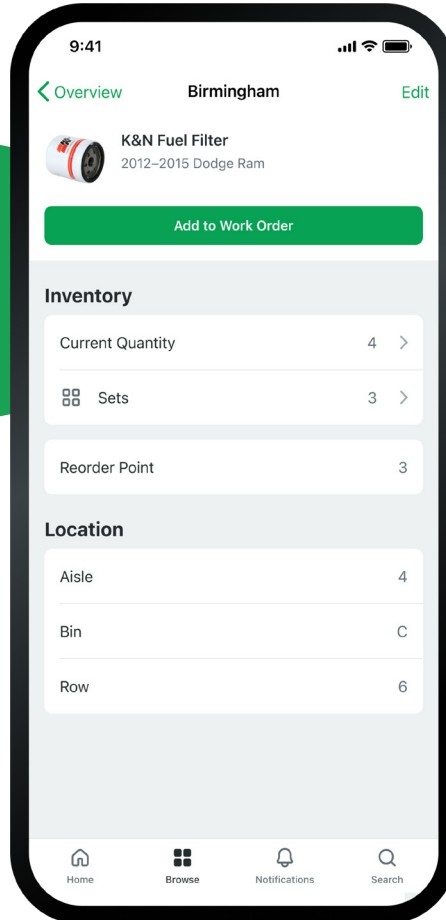

Parts & Inventory

Avoid part stockouts and vehicle downtime.

Inventory Management

Quickly make quantity adjustments to avoid part stockouts, reduce unnecessary costs and optimize space. Use inventory workflows to increase efficiency and stay up to date with automated reorder notifications.

Manage with the Fleetio Go App

Manage inventory on the go with Fleetio Parts. Access parts with barcode and QR code scanning, instantly update quantities, print custom labels and more.

Purchase Orders

Create detailed purchase orders for parts and work orders. You can even have team members send and approve them via a mobile device.

Parts Database

Manage details about your fleet's parts like manufacturer information, part location and photos all in one place. Track part allocation for work done on your vehicles and record part usage in Work Orders.

Telematics

Connect your telematics solutions to centralize your location data, fault code alerts, odometer readings and more.

Automatic Odometer Updates

Stop relying on drivers to report odometer readings. Values are synced to Fleetio automatically helping you keep accurate vehicle records and stay on top of preventative maintenance.

Inspection Defects

Defects from driver inspection reports automatically open an issue in Fleetio, ensuring problems are visible and get addressed quickly.

Fuel Location Exceptions

Ever been suspicious of fuel theft? Now fuel card transactions are automatically compared against actual vehicle locations, and geolocation differences exceeding a certain threshold are flagged.

DTC & Engine Faults

Receive notifications about DTCs and Engine Faults and create an issue in one click. Critical fault codes can be flagged using custom rules so they can be assigned and repaired fast.

30+ Telematics Integrations

Fleetio's library of out-of-the-box integrations is always growing. Choose from more than 30 industry-leading telematics solutions, or build something custom using our API.

Fuel Management

Reduce one of your largest operational costs - fuel.
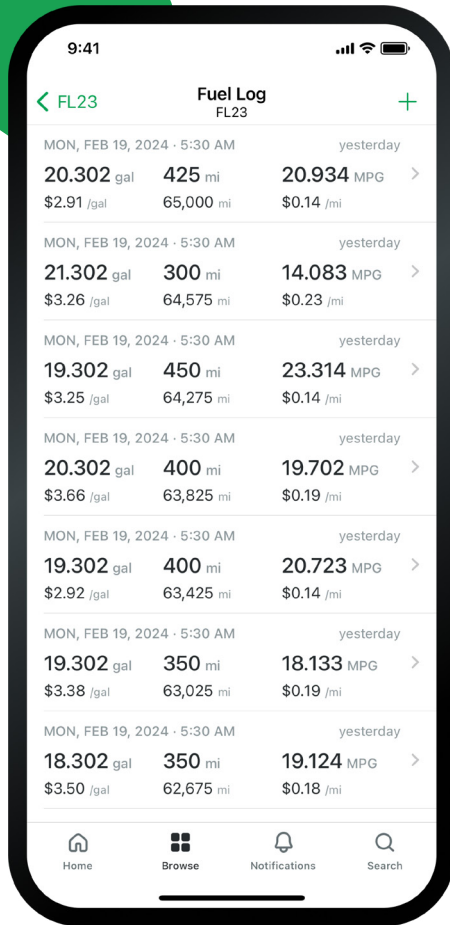

Fuel Tracking

Drivers can quickly input fuel data like quantity, price/gallon, odometer reading, cost and photos right at the pump with Fleetio Go.

Go Log fuel transactions from anywhere using the Fleetio Go mobile app.

Import Fuel Transactions

Import fuel data from a spreadsheet. Create reusable templates and quickly import data from the same source on a regular basis.

Fuel Metrics

Fuel economy (MPG, km/L & L/100km) is automatically calculated for each fill-up. Monitor your fleet's fuel efficiency and spend with fuel-specific reports.

COMDATA   **WEX**

FLEETCOR®   **EFS®**

Fuel Card Automation

Fuel data is automatically imported from supported fuel cards. Updates from the pump trigger maintenance alerts, and odometer validation ensures accurate fuel reporting. Notifications are sent when invalid mileages are detected so they can be corrected - improving fuel economy metrics.

Fleetio Go Mobile App

Monitor, empower and communicate with drivers, technicians and operators.

Fleetio Go
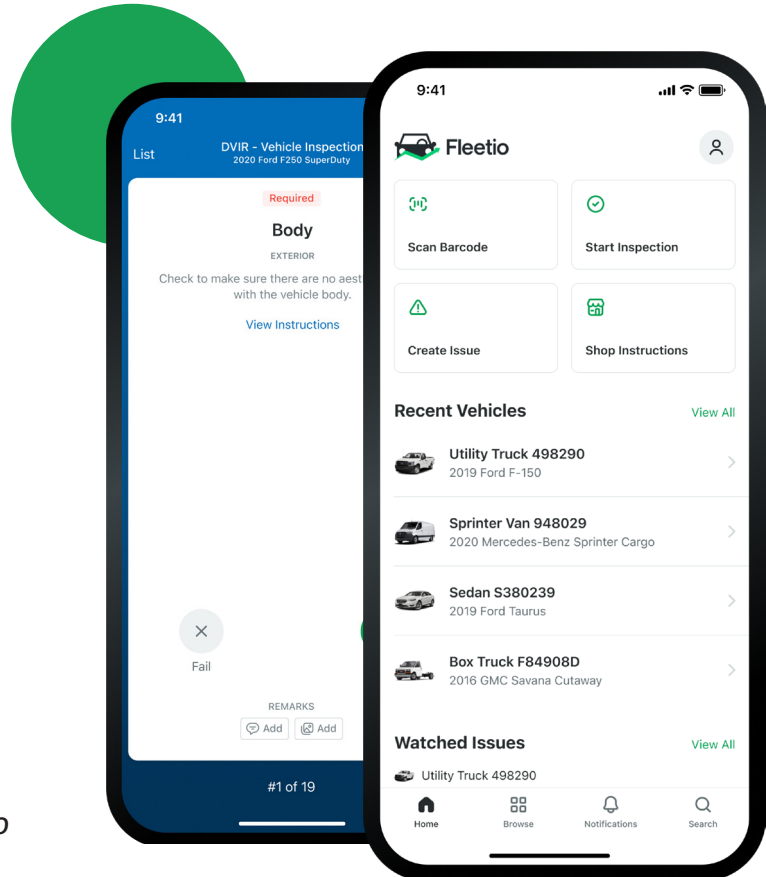

The simple way to:

- Conduct inspections
- Log vehicle issues
- Record fuel ups
- Locate third-party shops
- Manage work orders
- Update parts information
- Manage Inventory
- and more!

"

We couldn't be happier. In fact, our Maintenance team looks for opportunities to share the Fleetio Go App with everyone they see.

Collaboration & Customization

Share responsibilities and data among people and systems.

Contact List

Aaron Lawson — alawson@gmail.com (808)965-3209 — 3

Jesse Lee — jesseel@gmail.com (808)921-9440 — 1

SAML Support

Sign into your SAML 2.0 compliant Identity Provider portals (Microsoft Active Directory Federation Services, Okta, Ping Identity, Shibboleth and others) with existing credentials and then access Fleetio with a single click, without having to enter any Fleetio-specific passwords or account names.

Unlimited Users

Fleet management is best with shared responsibilities. Add unlimited users to keep everyone on the same page. Flexible permissions let you control what each user can do and which assets they can access.

Vendor Management

Track important details about third-party service providers, fuel vendors, in-house groups or cost centers. Link them to maintenance and fuel records, making it easy to see exactly how much you're spending with each vendor.
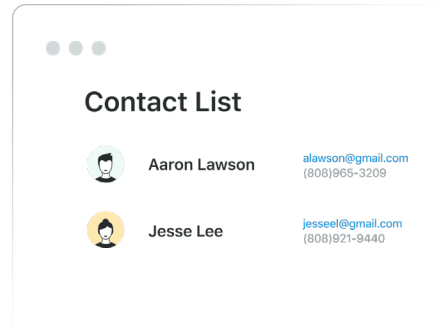

Contact Management

Track important details about your drivers, mechanics and other fleet employees. Save license info, important documents, contact information and more and manage them from anywhere using the Fleetio Go mobile app.

Developer API & Webhooks

Software is most powerful when its data can be leveraged by other systems. Push and pull data from Fleetio to other systems and applications (and vice versa)— vehicle records, maintenance logs, driver information, location and much more.

Custom Branding

Make Fleetio look and feel like an extension of your internal systems with your company logo.

Quality Support

Get the most out of Fleetio by emailing or calling our Customer Success Team when you need assistance. Experience what many say is "the best customer service ever!"

Accessible Help Center

Utilize the Fleetio Help Center any time as questions come up. Get simple documentation, video walkthroughs and detailed guides for more complex features.

Ongoing Training

Live webinars cover everything from Fleetio basics to feature deep dives. Ensure your team is getting the most out of Fleetio by attending whenever you like.

Professional Services

Our Customer Success team offers an effective combination of deep product knowledge and fleet management expertise to get your team working in Fleetio, faster.

66

My experience with the platform and their team has exceeded my expectations time and time again.
