FuelCloud Integrates with Fleetio
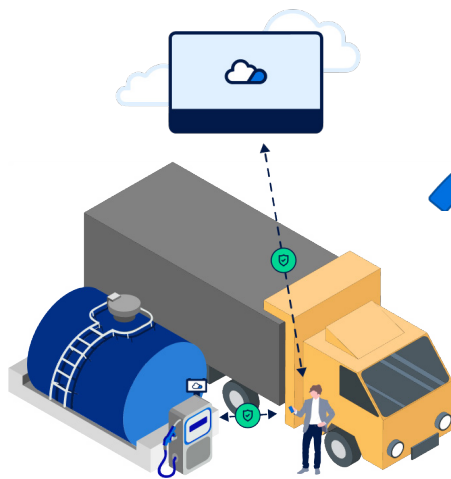

Track your fuel from tank to tailpipe
with our Fleetio integration

How It Works

Fleetio automatically pulls transactions into their industry-leading fleet maintenance and optimization platform.

Fuel transactions monitored by FuelCloud are uploaded into your FuelCloud web portal.

Fuel and fleet data are combined in Fleetio, creating a complete data picture of the fleet

Manage your fuel and maintenance data in one place

Automate fuel tracking and reporting tasks
Sync fuel transactions from FuelCloud to Fleetio for easy tracking. Trigger service reminders by including odometer readings!

Monitor fueling trends per site and detect possible theft
Pair vehicle tank capacity alerts in Fleetio with driver and pump access controls in FuelCloud for fuel use clarity

Report on fleet-wide operating costs
Understand how fuel spend factors into overall operating costs with detailed reports and cost calculations in Fleetio
