# Fleetio + samsara

Save Time and Get Full Maintenance Visibility

Real-time data visibility and tracking from Samsara meets the centralization and workflow power of Fleetio

Fleetio takes your valuable telematics and diagnostic data from Samsara and surfaces insights through maintenance, scheduling, and reporting.

See how your fleet is performing in a whole new way.

Faults

All Open Pending Resolved Ignored

Vehicle	Code	Critical	Name	Description	Status	Issue
0M4HH0	T212	✓	—	EVAP system leak detected (fuel cap loose/off)	Open	—
0M4HH0	P0420	—	—	Catalyst System Efficiency Below Threshold Bank 1	Resolved	#1662
2007 Chevy 3500 Express Passenger	P0125	—	P0125	Engine cooling system may not be working properly	Pending	#1645

Ignore
View Fault Rule →

Integration Functionality

Location →
View asset location, driving status and more in the vehicle overview. Get insights into suspicious fueling activity with fuel location exceptions. With this data, you'll know when a fuel transaction takes place away from where the asset is located.*

Odometer readings →
Odometer readings are updated automatically and trigger preventative maintenance reminders. Set up notifications to remind technicians about critical vehicle maintenance, such as oil changes, tire rotations and more.

Faults/DTC/ Alarm Codes →
Get notifications when fault codes are detected and create Issues in Fleetio with one-click. Assign issues to mechanics for review and kick off maintenance workflows such as work orders.

DVIR Defects ⇄
Defects from completed Driver Vehicle Inspection Reports (DVIRs) in Samsara are automatically synced to Fleetio. Once the issue is resolved, Fleetio will push the resolution back into Samsara to increase transparency and maintain data consistency.

Sensor Data (beta) →
View real-time sensor values for vehicles to monitor driver safety and vehicle health. Faults are flagged as recent events so you can dig into the vehicle's condition at the exact time the fault was triggered.**

*this functionality requires a fuel card integration to be set up
**based on availability by vehicle and device
