

3 Ways Samsara & Fleetio Can Improve Your Fleet Efficiency

The seamless integration of Samsara and Fleetio solutions creates an even stronger all-in-one platform for fleet management. By increasing overall visibility, fleet managers can use data to increase their operational efficiency and discover unexpected savings. Read on to see three ways that this partnership can improve fleet management.

1 Inspections

Discover which inefficiencies are costing your organization the most with increased visibility and reporting.

- Right-size your fleet with total cost of ownership calculation and assets utilization reports.
- Identify fuel savings with reports that calculate cost-per-mile, easily check for fuel theft, and optimize routing.
- Avoid overstock or critical shortages with effective inventory management tools.
- Use the Samsara Safety Inbox and video retrieval features to review incidents to avoid false claims and exonerate drivers.

2 Save Time

Monitor operations in a single view with a consolidated fleet management system.

- Spend less time with real-time visibility into the location of your assets, vehicles, and equipment.
- Implement preventative maintenance schedules and easily approve maintenance requests to prevent downtime.
- Consolidate billing for all outsourced maintenance through the Fleetio Maintenance Provider Network.

3 Go Paperless

Stay on top of operations and streamline communication with digital workflows.

- Eliminate manual entries and streamline document sharing.
- Data is securely transferred between platforms to allow insights through configurable reports.
- Automatically track IFTA mileage, HOS, route changes, and digital document capture through the Samsara Driver App.
- Quickly manage vehicle inspections and documents issues through eDVIRS.
